

Troubleshooting Mobile Issues

Troubleshooting mobile issues Matching exercise

Solve common mobile device problems

Review common mobile device problems and test your knowledge of how to correctly repair the devices.

Can you troubleshoot these mobile device problems?

Match each problem to the correct solution. First, select a solution. Then, select a problem to find out if it's a match.

Solution

Reboot the device, and if that doesn't work, download a firmware update

Check the device's RMA process and then send back to the vendor

Reset the device to factory settings to eliminate malware

Ensure data is backed up to the cloud before device is reset

Use the proper tools and repair the device

Problem

Device automatically downloads unwanted apps

Device is being replaced

Charging port has damaged pins

Device screen is cracked

Device has no connectivity

Answer:
